

Sirs, This is to register my vehement protest against your plans to do away with FCC rules that forbid one organization to dominate the media in one city / town / area by owning all of the biggest stations, newspapers, etc. The rules were established to safeguard for Americans the right to learn the truth by having access to more than one source of information. The rules were also established to guard our freedom of speech. I am not interested in having Mr. Murdoch or another billionaire right-winger provide me with his version of the truth, nor in his withholding information that he considers unhelpful for those of his political persuasion. Sincerely, R. Patterson
